

**UTC Derby Pride Park**

Trustee

Chair of UTC Governors

Pecuniary Interests	26 October 2020	Employee Rolls-Royce
<p><b>Personal Profile:</b></p> <p>I served my Apprenticeship at a SME in Derby as a CNC machinist before joining NEI as an Engineering Skills instructor. This role involved delivering Machining and Fitting skills training in the first year to numerous Apprentices from the local SME's in Derby/Derbyshire and managing their Apprentice training programmes once they had returned to their employers. I transferred to Rolls Royce training centre at the LDC in Derby in September 2003, continuing in the same role before progressing to Team Leader and recently manager of the Engineering Skills Team. I am now responsible for the first-year delivery for all RR Apprentices across the UK which requires lots of contact with Colleges and Training Providers. In 2011 I was responsible for securing the funding and programme as well as managing the build of the Apprentice Academy.</p> <p>For the past six years I have been working on the new Derby UTC based on Pride Park in Derby. This has required me to sit on both the Curriculum and Building Steering Groups. I have been asked to be a Trustee Director of the UTC, a role which I have accepted with great pride.</p> <p>My main hobby (some would say obsession) outside of work is Golf as well socialising with family and friends. I am a member of Makeover Golf Course in Derby where I play twice a week in competitive golf competitions as well as playing in open competitions throughout Derbyshire. I also have a keen interest most other mainstream sports.</p> <p>Andy's skills are:</p> <p>In depth knowledge of training specifically around apprenticeship training and frameworks. My current role requires project management, management and coaching skills.</p>
