Personal Profile:		
<p>Mandy has worked in the NHS for the past 37 years. Her career has been spent in the field of healthcare science where she trained as a cardiac physiologist. For many years she has been involved in the education and training elements of her profession, developing and managing undergraduate programmes and apprenticeship training programmes within the NHS. She works with regional and national groups to implement training and career frameworks which will allow varied routes into the healthcare science profession for the future workforce.</p>		
<p>Mandy's skills are:</p> <p>Well developed leadership and management skills within the NHS and many years experience of working with young people to help them identify career paths and support them in that chosen training route.</p>
