- Enter your SDK code. This is sent to teachers in September each year.
- Always select the latest version of SOLIDWORKS because the old versions stop working after a while and you might get errors about out of date serial numbers.
- Enter a working email address.
- If you need to install an older version, first fill out the form with the latest version selected. Take note of the serial number that you get after filling out the form. ## FAQ's

### **Can SOLIDWORKS run on a Mac or Apple computer?**

No\*. SOLIDWORKS is not officially supported on MacOS or Apple computers

\*There is a method of installing it using programs such as "Boot Camp" or "Parallels". Installing using this method would mean you would have to purchase a license of Windows and either "Boot Camp" or "Parallels". This is not recommended for students as it is costly, complicated and it essentially means you are running Windows on an Apple computer. In this case a Windows based computer would be far better.

### **Can SOLIDWORKS be installed or upgraded on a 32bit computer? No.**

Unfortunately, SOLIDWORKS is no longer supported on 32bit computers. The last supported release of SOLIDWORKS on 32bit computers was 2014 and unfortunately it cannot be downloaded anymore.

### **Where do I go if the install has errors?**

Ask your teacher for help. They can give you help installing SOLIDWORKS.

### **I want to upgrade a Student Design Kit that I already have installed.**

#### **How do I do this?**

We would recommend that you uninstall the previous Student Design Kit, fill out the form again, get a new serial number and install the new Student Design Kit.

### **Where are the render tools in the Student Design Kit?**

Student Design Kits do not include any of the advanced SOLIDWORKS Addins and you cannot render using the Student Design Kit. Students must use school computers to carry out work like this.

### **Can I download an older version of the Student Design Kit?**

Unfortunately only the last 3 years of Student Design Kits can be downloaded. Solid Solutions Ireland is part of the Solid Solutions Group
